

ATTENTION

Dear customers,

Thank you for buying the new GS-60 Power bagless cleaner from Bosch.

This vacuum cleaner is equipped with top of the range features, which include Lifetime HEPA filters. This means that, during normal household use, **all filters last the entire lifespan of the appliance and do not require replacing**. Within some early instruction manuals however, it is incorrectly stated that filters require replacing.

Please find the correct instructions for exhaust filter maintenance as follows:

In order to ensure that the machine works at its optimum performance level, please wash the filter every 3 years. Whilst the filter surface may discolour, the filtration performance is not affected by this.

To remove the filter, just follow these 4 steps:

- Open the exhaust grill by pressing the release button
- Unclip the HEPA filter by pressing the locking tab and remove it from the appliance
- Rinse the HEPA filter under running water
- Once the filter has dried completely, re-insert the HEPA filter, close the lid and your vacuum is ready to use

Please visit www.bosch-home.co.uk for more product information. To register your product, just follow the link to the Online guarantee registration.

In case of any further questions please give us a call on 0844 892 8923 or within ROI on 01450 2655*.

Best regards,
